**Series 36A**

**Bolted/Edge Welded Bonnet Valve - Straight Pattern**

Class 900/1500 bellows sealed globe valve, standard bore, outside screw and yoke, bolted and lip-seal welded bonnet. ASME III option available. Secondary gland in the event of bellows failure. Available with integral hard faced seat to offer increased resistance against erosion. Valve can be supplied with manual operation or actuated - electric or pneumatic. Manual valve and electrically actuated valve shown.

Valve shown is with a leak detection port, to provide early warning of any bellows failure. Extended spindles, type and length are designed to suit customer requirements. Weights shown are without extended spindle. Pneumatically actuated valves are available.
